## About us

Elen company is specialized in offering services in project design and installation of photovoltaic systems, electrical power systems, micro-grid, and energy efficiency solutions.

The DNA of Elen has always been marked by a pioneering spirit, honesty, and the mission to develop green technologies and move towards a brighter future.

Our aim is to always put clients and their needs at the centre of what we do. Only this way we can be pragmatic to our customers and bring value to the society.

Elen is committed to designing and building green and digital infrastructure.

As a well-known leader for years in Kosovo, we now have expanded our activity in Albania and Macedonia, aiming to expand it to other European countries as well.

## Our Mission:

to work with the highest standards of business ethics and create value from which our customers feel secure in their investments.

## Our vision:

to further develop and continue to be the leader in providing products and services in the field of renewable energy and power system.

## Our Team

## Our team

What leads us to success is the great communication, understanding, enthusiasm, shared values and goals between our team. We support entrepreneurial thinking, acting, and provide healthy leadership where everyone can be themselves and share original opinions.

Part of this success are undeniably our partners, customers, and other businesses in this field that share the same vision as ours.

MORE  
THAN

50

PEOPLE  
STAFF

## Innovative

Our team is always looking for new and creative ways to improve our products and services.

## Passionate

We are passionate about renewable energy and are committed to making a positive impact on the environment.

## Knowledgeable

Our team has a deep understanding of the solar energy industry and keeps up-to-date with the latest technologies and trends.

## Customer-focused

We prioritize the needs of our customers, delivering high-quality solutions that meet their specific requirements.

## Professional

Our team is highly skilled and maintains the highest standards of professionalism in all aspects of our work.

## Products and Services

Elen is a leader in the field of renewable energy and other energy services. We design, develop, and implement large-scale energy projects. In addition to generate renewable energy, we offer our services to optimize energy efficiency, increase savings for our clients, and reduce harmful chemicals into the atmosphere simultaneously.

We help identify energy problems and opportunities for improvement. Based on analyses, we develop solutions and design energy efficiency projects. We plan and project, implement, manage and maintain all installed equipment.

“

With a deep understanding of the different sectors our clients come from and the specifics of their work and energy needs based on our extensive experience, we offer a variety of tailor-made solutions for each client

”

We offer a wide range of products and services for renewable energy, electrical engineering, and IT as listed below:

## Solar Energy

---

PV Solar System installation from small farms to large PV Solar parks

## Micro-grid and Energy Storage

---

Along with the energy produced we also offer ways of accumulating and storing it.

## Electro Mobility

---

Providing electric charger of all capacities.

## Electrical Installation

---

Installation of electrical units for individual, residential, and commercial buildings.

Two small, dark silhouettes of birds are visible in flight, one in the upper right and one in the lower left. The text "Your partner" is centered in the middle of the image.

Your partner

for energy!

# Elen covers the entire renewable energy value chain.

**ELEN  
PREMIUM  
PARTNERS**

## **LEAD GENERATION**

Simple introduction, quick customer acquisition and professional marketing using minimal resources  
Promotional tools and services such as the solar power calculator. Advertising material or the Elen SOLAR Competence Center for your training courses

## **SERVICE & MAINTENANCE**

High-quality service as a result of established processes and intensive training courses  
Short response time thanks to the national Premium Partner network and in-house aftersales department

## **TURNKEY ASSEMBLY**

First-class, turnkey systems from a single source  
Close customer contact with quick flow of information

SATISFIED  
CUSTOMERS

# Solar Energy

We are a world-rank renewable energy developer, service supplier, wholesaler and energy solution provider. We provide comprehensive and top-quality results to our clients. Elen is an expert project developer with years of experience in delivering solar PV projects. With a track record in integrating solar PV into power plants we can manage all kinds of hybrid projects.

## Project Development

In order to go everything as planned we take precise measurements, frequent on-site visits, constant communication with the team. Also, we take care of every paper work needed for the project.

## EPC Services

We support and arrange project finance, create project designs, layouts, procure components and subcontractors, construct solar power plants through subsidiary company, participate in EPC and IPP solar PV tenders.

## Turnkey Construction

We cover the whole value chain and take full responsibility for design, procurement, construction, so turnkey hybrid plants can be delivered to our partners or investors. Our team consists of inhouse civil and electrical engineers, construction managers, HSE experts and grid specialists which take care for everything to go as planned.

# Microgrids and Energy Storage

Elen is building the energy grid of the future: sustainable, reliable, and innovative.

Microgrids help sustain the future of energy and ensure reliable power supply to meet customer demands.

Simple, safe, scalable energy storage technology. Your standardized Technology Stack makes it easier for you to rapidly and cost effectively deploy energy storage without sacrificing quality and configurability.

- Sustainable
- Reliable
- Innovative
- Simple
- Safe

# Electromobility

Electromobility is slowly but surely finding its way into modern cities and communities. The charging infrastructure required for this has an impact on the distribution networks. And that in turn induces a challenge for network operation. Not only network operators and municipal utilities, but also area network operators must be able to deal with the effects of electromobility.

System stability, security, and (cost) efficiency are the most important factors in the field of electromobility in order to operate successfully on the market. We offer all solution for every type of e-mobility requirements.

# Electrical installations

Elen has designed and installed a wide range of electrical installations. We undertake projects for a wide variety of clients including businesses, government organizations and private individuals.

Our range of electrical services includes:

- The installation of transformers together with MV and LV cubicles
- Wiring and installation of equipment for the transmission of data
- Maintenance and servicing of equipment and complete systems
- All electrical installations related to the nature of the object
- All applications related to lighting and power supplies
- Design & verification of electrical installations
- The Final inspection by a team of engineers
- Earthing and lightning protection systems
- Emergency Lighting Systems
- Fire alarm Systems
- Public Lighting

## Electrical installations

We are committed to work and perform according to the highest standards of quality safety and environmental protection.

# Our Clients

## Overview

All in one hand  
about PV Solar Energy Projects

Elen is offering a 100% money  
back guarantee regarding the  
yield of its installations.

We take full responsibility on  
the predictions of the annual  
energy yield.

With Elen's yield warranty, the  
investor gets back the relative  
share of the turnkey price in  
case of an underperforming  
installation, e.g. 10% less  
electricity yield leads to 10%  
price reduction for the  
installation.

We are able to offer this  
security of return on investment  
through particular tuning  
measures in each phase of the  
project:

## Project development: view

Elen installations are  
planned for performance  
and sustainability.

Based on detailed evaluation  
of the project site, we ensure  
optimal yield for the investor,  
e.g. by choosing the best  
components, optimal cabling,  
layout, and predictions for  
extreme climate conditions.

## Execution

Elen's experienced project managers ensure that the installations meet all planning and design requirements, which include: calibration of module positions based on accurate measurements and sorting in the factory, carefully laying of cables to avoid internal or external disturbances and energy losses.

## Operation & Maintenance

During the instalment of the PV solar project, we use guaranteed products, testing equipment, and most importantly we monitor the whole projects from the beginning till the moment when it starts producing electricity. Elen Solar has the capabilities and experience in all aspects of solar plant operation and maintenance (O&M) to help deliver optimal power.
